OBJECTIVE

To leverage my knowledge of application development, programming, and web platform development to expand my skills with an internship full-time summer 2023, part-time through the school year, or a full-time position upon graduation.

EDUCATION

The University of Akron   **Akron, OH**

Candidate for Bachelor's Degree in Computer Science   Graduating 12/23

Cumulative GPA: 3.7/4.0

Dean's List   2020 - Present

President's List   2021 - Present

RELEVANT EXPERIENCE

Giffin Equipment *(Contracted Website Devloper)*   **Remote**

• Designed and implemented changes to improve the functionality of the company's website   5/22 - Present

• Created application form and improved process for visitors, resulting in more than triple the number of job applications received

• Designed new features and additions to the site to improve user experience and social media engagement

Art Sentry *(Software Developer Intern)*   **Middleburg hts, OH**

• Created testing tools and applications to incrementally track and improve performance of software   5/22 - 4/23

• Improved and automated compilation and packaging for software builds and releases, resulting in improved consistency, reliability, and costs

• Identified and proposed solutions to various bugs and inconsistencies in the software, resulting in an improved user experience and significant reduction of complaints

• Implemented new software deployment method that is platform-independent and drastically reduced installation time and costs for the company and its customers

TECHNICAL SKILLS

Tools/Frameworks: Git, React, GitHub Actions, Visual Studio/Code, Docker, IntelliJ, Bash, Maven

Languages: C++, Typescript, JavaScript, Python, Java, HTML/CSS, PHP, SQL, Swift

Operating Systems: Windows, Linux, Mac

PROJECTS

Spotify Wrapped Monthly *(github.com/jordanwmckee/spotify-wrapped)*

Developed a website with React using vite, typescript, the Spotify Web Api, and the Spotify Playback SDK. It allows users to sign in with their Spotify account and gives a detailed view of their monthly listening analytics, allows them to listen to their top tracks of the month, follow artists, and add songs to their playlists.

RTSP Server Testing Tool *(github.com/jordanwmckee/rtsp-server)*

Created a testing tool with bash scripts and ffmpeg, and packaged it in a docker image. It provides fake camera connections to a server through an rtsp stream by streaming sample videos upon rtsp request.

Meteors Arcade Game *(github.com/jordanwmckee/java-swing-game)*

Designed and programmed a simple Galaga-style arcade game in java that implements java swing. Taking user input to update the graphics, it allows the user to shoot the asteroids and aim for a high score.

ACTIVITIES

The University of Akron Round Net Club   8/21 - Present

100+ Hours of Community Service

Other Interests: writing code, graphic design, golf
